## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4, 7, and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Goto et al. (US patent No. 6,388,653).

As to claims 1, 4, 7, and 9, Goto discloses a driving apparatus of liquid crystal display apparatus, comprising: first and second amplifier circuits (271, 272, Fig. 7) that amplifying a non inverted input signal or an inverted input signal; a first changeover circuit (302, Fig. 39) that selectively switches and outputs the noninverted and inverted input signals to be outputted to the first and second amplifier circuits (271, 272, Fig. 39); a second changeover circuit (264, Fig. 39) that selectively switches and outputs output signals of the first and second amplifier circuits to pixels provided in a matrix manner in accordance with an alternation signal, and a changeover control circuit (152, Fig. 39) that controls switching of the first and second changeover circuits so that (a) polarity of an offset voltage to be applied to the pixel by the first and second changeover circuits is changed for every predetermined number of frames and (b) the offset voltage is canceled by frame whose number is twice as many as the predetermined number of frames. For example, as shown in Figs. 19-20, the offset voltages (Vofl and Vofh) are canceled by 4 frames whose number is twice as many as the predetermined two frames.

***Allowable Subject Matter***

3. Claims 2, 3, 5, 6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US Patents 5,093,655, 5,233,340, 5,365,284, 6,166,725 and 6,331,846 are cited to teach a LCD display device.
